One-Day Courses 2010 - General Information

About the Course

The course is designed for people who have an interest in gliding and want the best opportunity to experience gliding and to learn some of the basic principles of flying. The day will be devoted to your flying needs, giving you some basic information and instructional flying in our two seater gliders. You will handle the aircraft in the air and start the learning process of how to use the elements around you; putting into practice some of the basic information you will have been given. Whilst others are flying you will become part of the essential ground team helping others to fly. The course will typically consist of three aerotows or six winch launches (or a combination of these). The launch method may be subject to alteration due to the needs of the clubs operation or student requirements. Start time is 9-00AM. Our friendly club members will encourage you to participate in all the activities and help you with any questions you might have.

Cost

£175 Includes 30 days club membership plus a glider pilot logbook.
